TECHNICAL SKILLS & COMPETENCIES

Programming Languages:	Python, C++, Java, JavaScript, TypeScript, SQL, Go
Frameworks & Backend:	Django, FastAPI, React, Node.js, Express, RESTful Microservices
Databases & Cloud:	PostgreSQL, MySQL, Redis, MongoDB, Docker, AWS (S3, EC2, Lambda), Git/GitHub
Core CS Fundamentals:	Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

KEY PROJECTS & ENGINEERING EXPERIENCE

1. Distributed High-Throughput Matching & Order Routing Engine
- Architected an ultra low-latency order matching engine in Python and C++ capable of executing 10,000+ RPS.
- Integrated Redis cache layers and asynchronous Celery workers to prevent database race conditions and bottlenecks.

2. Autonomous Full-Stack AI Placement Governance Portal
- Engineered an automated university career management system featuring multi-role authentication (Student, TPO, Recruiter).
- Developed dynamic criteria evaluation engines (10th, 12th/Diploma, CPI, 0-Backlogs) and conflict-free Superday interview slot allocators.

3. Cloud-Native Real-Time Collaborative Whiteboard & Code Editor
- Implemented WebSockets and CRDTs for real-time multi-user collaborative code synchronization.
- Deployed containerized Docker microservices with automated CI/CD pipelines on AWS.

HONOURS, AWARDS & LEADERSHIP

- **Dean's Honour Roll:** Awarded top 5% academic excellence scholarship for consecutive semesters.
- **Hackathon Winner:** 1st Prize in Inter-College National Techfest Hackathon among 250+ teams.
- **Competitive Coding:** Solved 450+ LeetCode problems; Rated top 3% in global algorithmic contests.

DPC CERTIFICATION & INSTITUTIONAL SIGN-OFF
This document is officially certified by the Department Placement Coordination Committee (DPC). All academic marks, degree semester SGPA pointers, and backlog records have been cross-checked with official university controller of examination transcripts.
